PROFESSIONAL EXPERIENCE

Resume Worded, New York, NY

Jun 2018 – Present

Senior Java Developer

- Built, maintained, enhanced, and scaled infrastructure for a web app that grew to 1.5 million monthly users.
- Owned production alerts while acting as the POC for infrastructure incidents to enhance general productivity.
- Worked with COO to understand workflows needing automation and save 200 hrs of monthly manual work.
- Headed the adoption of J2ME to streamline development for mobile, improving customer adoption by 6%.
- Worked on and supported 50 automated builds, deployments, validations, and configurations for public AWS.

Growthsi, New York, NY

Jan 2015 – May 2018

Java Developer

- Spearheaded a team of 3 competent professionals to build vendor integration and automatic booking fulfillment module while developing a framework to integrate vendor APIs with existing Java Spring Backend.
- Introduced libraries famous in the android world to the codebase like Retrofit, OkHttp, and RxJava. Built Java wrapper for jqgrid for automatic integration with Hibernate to create a Django-like admin for database tables.
- Expertly started a 2-way communication for new microservice and existing codebase using Google Protobufs.
- Directed a team of 2 full-time employees and 1 contractor for a project that improves all digital transactions.

Resume Worded, San Francisco, CA

June 2008 – Dec 2014

Java Developer (Nov 2011 – Dec 2014)

- Worked across the SDLC to develop meaningful features for clients, delivering over \$3M of business value.
- Built a testing tool to quickly test codes in a dev environment, reducing error rates to production by 15%.
- Reviewed, audited, and onboarded external vendors to the network to handle billions of concurrent requests.
- Scaled the backend infrastructure as the company expanded into new countries, maintaining 99.9% uptime.
- Integrated APIs for 3 small vendors with auth flows and payment methods to facilitate operations continuity.

Android Developer (May 2010 – Oct 2011)

- Managed a team of 3 developers, working with 4 different clients to build Android applications from scratch.
- Strategically designed suitable architecture for the requirements by evaluating third-party libraries by functionality, code bloat, and performance, gaining a client satisfaction rate of 98% for project deliverables.
- Created 100+ automation and code generation tools for project set-ups to ensure on-time project delivery.
- Served as an Android Developer on projects from 4 areas, developing and deploying two apps from scratch.
- Implemented given designs into the apps while learning core android UI principles for new design concepts.
